Manage the portfolio according to company strategy and business needs

Keep portfolio data up to date and aligned with Management Board and Managing Directors of the subsidiaries regional and central.

PPM lead for Shared projects.

12/2010–12/2015

fondatore e proprietario

Par.co Fashion, Bergamo (Italia)

Sustainable fashion represents an approach to the design, sourcing and manufacture of clothing which maximizes benefits to people and communities while minimizing the impact on the environment.

Choosing natural, organic and innovative fibers combined with major changes in the production chain, we significantly reduced water consumption and removed chemicals substances dangerous for people and for the environment. Natural fibers like Organic cotton grown in certified farms.

Organic cotton is then spinned, weaved, warped and dyed on historical looms in Japan, country with high environmental requisites and in Italy by certified firms, GOTS, OEKO-TEX, SA8100, and that signed Greenpeace Fashion Detox Commitment.

Products are then cut and sewn in NorthItaly by Italian craftsmen with 3 family-generation of denim production experience.

Eco-Washes and treatments are done by innovative Italian laundries with ice, natural resins and with Eco-aging, a natural and 100% biodegradable treatment that permit to substitute dangerous "sandblasting" with a vegetable and eco-sustainable compost.

Branded buttons and rivets are nickel free
done in "historical buttons district" in Bergamo

As a results of our R&D team, we introduced
a new line with custom patterns laser workings and have each pair of Jeans unique receiving singular treatments.
